Function	8000/8000 mm	8000/8000 mm	8000/8000 mm
Coating	PU coating at back + teflon coating without fluorine substances	PU coating at back	PU coating at back
Seams	PU tape	PU tape	PU tape

We invest many resources in being abreast of developments and personally chase our suppliers to sign CSR agreements so that we can be sure that they live up to our high requirements and comply with our supplier manual. All this in order to be sure that our products live up to consumer expectations for genuinely good quality, zero hazardous substances and high level of safety.

BRANDS 4 KIDS®

WE ARE ONE STEP AHEAD WHEN IT COMES TO CHILDREN'S WEAR

RECYCLED

As something new for the AW20 outerwear collection all Herringbone styles are now recycled! This means that the main fabric is made of recycled polyester. So now our outerwear does not only keep the kids warm and dry, it also helps to save our environment due to the fact that it is made of recycled fabric. This could be fabric made of the plastic that pollute our beautiful oceans and beaches. Instead we are turning it into comfortable outerwear for the next generation.
